

Shared data solutions
Powering the UK Offshore Oil & Gas Industry

Seismic Data Manager

CDA is seeking an experienced seismic data management professional for the new Seismic DataStore¹ and other CDA seismic data initiatives.

The Position:

A senior member of the CDA Management Team, responsible for the successful operation and development of the Seismic DataStore.

The Seismic Data Manager will:

- ensure that CDA and the Seismic DataStore service provider fully meet their operational and service responsibilities to users and other stakeholders;
- work with the CDA community to develop and apply practical seismic data management practices, processes and standards in all operational areas; and
- work with users to identify, specify and implement developments and improvements in CDA's seismic data management services.

Candidate Requirements:

The successful candidate will have:

- at least 5 years of practical seismic data management experience in the UK;
- strong project management skills and a record of successful project delivery;
- extensive supporting knowledge of seismic acquisition, processing and interpretation; and
- an excellent understanding of current web technologies and web-based systems including database management and relevant software applications.

The successful candidate will be self-motivated and equally at ease working independently and as part of the CDA Management Team. Well developed inter-personal, communication and presentation skills are also essential.

This is a high profile position within the industry and requires sensitive professional relationships to be developed and maintained with key CDA stakeholders.

The position offers a competitive remuneration package based in either London or Aberdeen.

Application:

All applications will be treated in strictest confidence. CVs should be emailed to **Colleen Bonthron**, CDA's Commercial Manager (cbonthron@cdal.com) no later than **22nd May 2009** together with a brief narrative stating the applicant's suitability for the position.

About CDA

Common Data Access Limited is a not-for-profit subsidiary of Oil & Gas UK, set up in 1995 to provide shared data management services to industry (see www.cdal.com for more details).

¹ The CDA Seismic DataStore is a shared digital store of UKCS post-stack seismic data operated for CDA by Schlumberger Information Solutions under a contract awarded in February 2009.
